

# heat transfer society

**Christmas Buffet & Presidents Night**

**Tuesday, 20<sup>th</sup> December 2022**

## **Colin Weil, the Society President**

This is a chance for Society members and colleagues to get together for a special festive spread prior to the Christmas break.

As part of the evening Colin Weil, our President, will chat briefly about his time in the oil and gas industry since the 1960s. From the days before computers, when engineers needed to concentrate on one expertise rather than being generalists and had secretaries to type memos and reports!

In the late 1980's Norman Mitchell asked Colin to assist in running the HTS Annual Dinner. and after a few years Norman emigrated to Canada. Colin ran the dinners until just before Covid. He has also been the HTS Honorary Secretary for more years than he is willing to admit, but stood down this year.

Colin started with Fluor (England), moving through Powergas, aka Davy Powergas, aka Davy International, etc., etc., until settling into Marathon Oil. With that lot behind him he became a consultant, initially "trouble shooting" wayward heat exchangers. Then concentrating on managing various joint industry research projects which resulted in several good practice guides.

Underlying his heat exchanger activity, he became involved in developing unfired ISO heat exchanger standards and side-stepped into API standardisation.

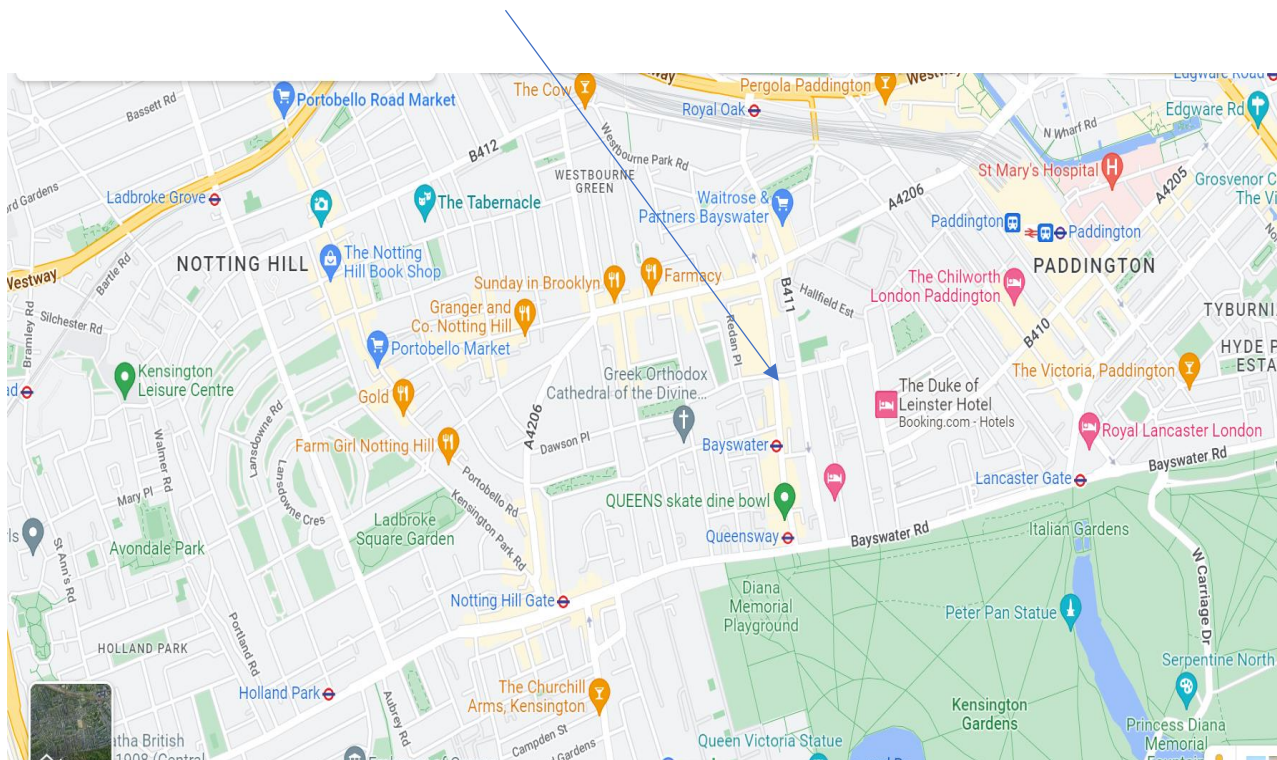

These API and ISO activities led to Colin becoming the (technical) editor for API's unfired heat exchanger standards. He is also the convenor for the ISO work group responsible for all oil and gas heat transfer equipment, and chair of the BSI shadow committee responsible for EN/ISO piping, equipment, and related safety system standards.

The President, Chairman and committee look forward to welcoming you at the Prince Alfred.

[www.hts.org.uk](http://www.hts.org.uk)

The talk is at 7pm with a buffet from 6pm. Cash bar.

Venue is **Prince Alfred**, 112 Queensway, London W2 3RR  
Nearest stations: Bayswater, Queensway, Paddington.

Please register your attendance: [HERE](#)

Members are encouraged to share this notice with others who may wish to attend.

The venue requires attendance number by 20 November.

### Future events

- ❖ 11<sup>th</sup> November 2022, Webinar - Francesco Coletti, Hexxcell Ltd, will present “Artificial Intelligence for Thermal Systems: the Good, the Bad, the Hybrid”.
- ❖ 24th November 2022, Webinar - Dave Walker, HyNet Project Manager, Progressive Energy will talk about a low carbon and hydrogen energy project in the North West.
- ❖ 31st March 2023, 57th HTS Annual Dinner - Grand Connaught Rooms, 61-65 Great Queen St, London WC2B 5DA.
