Dear Member,

**56<sup>th</sup> H. T. S. ANNUAL DINNER - Friday 25<sup>th</sup> March, 2022  
GRAND CONNAUGHT ROOMS, WC2 - 6.00 for 7.00 pm**

The HTS Annual Dinner is the most prestigious function in its event calendar. This year our unique learned society celebrates its 58<sup>th</sup> anniversary. Please join us at this special occasion.

Colin Weil will be installed as H.T.S. President for 2022. He has been involved in heat transfer since the early 1970's working for design houses such as Powergas (aka Davy), Badger and then Marathon Oil. He started out as a vessel engineer before getting involved in the thermal and mechanical design of (unfired) heat transfer equipment, progressing to what is euphemistically called a generalist. He became an independent consultant in 1996 and after a few years trouble shooting of broken or misbehaving heat exchangers became a programme manager for various research projects covering such diverse topics as multiphase flow, severe fires, 2-phase pressure relief sizing and tube failure in high pressure heat exchangers. In the background he was sucked into the world of drafting industry standards. He has worked for such organisations as the Energy Institute, Imperial College, and API. In recent years he has reduced his workload but is still directly involved in the drafting of API and ISO standards. He is chair of the BSI shadow sub-committee with responsibility for the ISO sub-committee that covers oil and gas equipment such as heat transfer, rotating equipment, piping, HVAC, pressure relief and topside safety systems.

In Colin's spare time he has been the Honorary Secretary for the Heat Transfer Society for more years than he should and has looked after the nuts and bolts for the annual dinner since there were trolley buses in London.

If you wish to attend, please complete the form below and return it to Simon Parsons (Dinner Coordinator) at the above address. Preferred dress for the occasion is lounge suit.

**President: Martin Gough      Chairman: David Norton      Secretary: Colin Weil**
