

## PRESIDENTS NIGHT

**17 OCTOBER 2024** 

## Fred Gardner, the Society President

## A Round Table Discussion - 'Fitness for Service Assessment – that is the question'

An informal evening with Society members and colleagues to reflect on the origins of the Society and reignite old conversations about the challenges of designing and operating heat exchangers over a pint! Our President will encourage attendees to rekindle 'round table' discussions on topics including material selection, flange/gasket design, 'fitness for service' assessments and risks associated with under-insulation corrosion. We hope you can join us and we would welcome suggestions of similar topics for discussion when registering.

Fred Gardner started his career at ICI Wilton Site gaining 20 years practical experience (including a 4-year apprenticeship). Then Fred moved to Wellman Graham Ltd in Gloucester as Principal Engineer, involved in the mechanical design of heat exchangers and later Foster Wheeler Energy Limited in Reading as Senior Heat Exchanger Engineer, later Principal Heat Exchanger Engineer. During this time the Heat Exchanger & Vessel Departments merged and Fred became Principal Equipment Engineer. Fred then moved to Foster Wheeler Energy Limited in Teesside as Chief Equipment Engineer, leading and managing the Equipment Group. He maintained a hands-on approach involved in all aspects of mechanical design, specifying repair procedures & carrying out fitness for service evaluations for pressure equipment. Fred then decided to move across to Valero Energy Ltd at Pembroke Refinery as Lead Mechanical Engineer, leading and managing a team of Fixed Equipment & Piping Engineers. After a re-organisation to align Pembroke Refinery based upon the Valero US model. He was assigned to the Reliability Department as a Senior Staff Mechanical Engineer, continuing to support the refinery as the sites subject matter expert for Fixed Equipment. The President, Chairman and committee look forward to welcoming you at the Artillery Arms.

www.hts.org.uk

The discussion is at 7pm with a buffet from 6pm. Cash bar.

Venue is **Artillery Arms**, 102 Bunhill Row, London EC1Y 8ND Nearest station: Old Street (Northern Line).

Please register your attendance and any suggested topics for 'round table' discussion: **HERE** 

Members are encouraged to share this notice with colleagues who may interest in this discussion.

## **Future events**

- ❖ 28<sup>th</sup> March 2025, One Day Conference jointly held with the IChemE's Fluid Separations Special Interest Group UCL, London.
- 28<sup>th</sup> March 2025, 59th HTS Annual Dinner Grand Connaught Rooms, 61-65 Great Queen St, London WC2B 5DA.
